

THE ARLINGTON REPORT

Volume 13, Issue 04
April 1, 2020

COVID-19 QUICK FACTS

Source: CDC.gov

1. Diseases can make anyone sick regardless of their race or ethnicity.

People of Asian descent are not more likely to get COVID-19 than any other American. Help stop fear by letting people know that being of Asian descent does not increase the risks for COVID-19.

2. Some people are at increased risk of getting COVID-19.

Those who have been in close contact with a person known to have COVID-19 or live in or have recently visited an area with ongoing spread are at an increased risk, as well as those over the age of 65 and/or with a compromised immune system.

3. Someone who has completed quarantine or has been released from isolation does not pose a risk of infection to other people.

4. You can help stop COVID-19 by knowing the signs and symptoms.

Fever • Cough • Shortness of Breath

Seek medical advice if you develop symptoms and have been in close contact with a person known to have COVID-19 or have recently been in an area with ongoing spread of the virus.

5. There are simple things you can do to help keep yourself and others healthy.

- Wash your hands often with soap and water for at least 20 seconds, especially after blowing your nose, coughing or sneezing; using the bathroom; and before handling or eating food.
- Avoid touching your face with unwashed hands.
- Cover your cough or sneeze with a tissue, then throw it in the trash.

Symptoms may not appear until 2-14 days after exposure.

NOW HIRING

The City of Arlington is currently hiring for a variety of positions including EMTs and seasonal Lawn Maintenance. For more information on the available positions or to learn how to apply, please visit the new Careers section of our website, which you can find linked at the very bottom of the site. If you have any questions please contact the City office for clarification.

DOWNTOWN RECYCLING
April 11th & 25th

HYDRANT FLUSHING

starts April 13th, weather permitting.

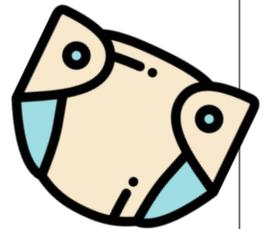

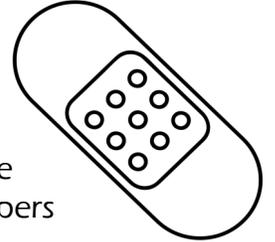

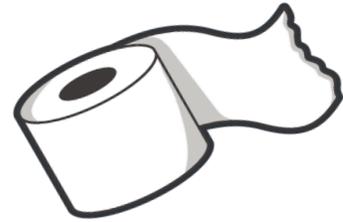

TO FLUSH OR NOT TO FLUSH?

It may seem like common sense, but there are certain items that seem like they should be flushable, but actually can damage the sewage and water treatment systems. Here is a list of some things that you should not flush or put down any drain in your home:

- Baby wipes
- Bandages & wrappers
- Cigarette butts
- Condoms & wrappers
- Cotton balls & swabs
- Cat litter
- Dental Floss
- Coffee Grounds
- Diapers
- Feminine hygiene products & wrappers
- Personal care wipes
- Disposable mops & duster heads
- Paper towels
- Produce labels
- Grease or oil

Even though these everyday items are small in size, they can lead to very costly (and gross!) plumbing problems for you, your neighbors, and/or the wastewater treatment facility.

STAY AT HOME

On Friday, March 27th at 11:59PM the Governor's "Stay at Home" Order went into effect. Please follow the guidelines to ensure the health and safety of yourself and those around you. The order is currently set to lift at 5:00PM Friday, April 10th.

BE COURTEOUS...

Please clean up after your dog in public spaces!

APRIL PUBLIC MEETINGS*

City Council	6:30PM	4/6
Planning & Zoning	7:00PM	4/9
